SKILLS

Programming

Python | Flask | FastAPI | SQL | asyncio | C++ | JavaScript

3D & CAD

Fusion 360 | AutoCAD | CATIA | FDM | SLS | SLA

Robotics & IoT

Arduino | Raspberry Pi | ROS | OpenCV | Blynk

Telecom

VoIP | SIP | Telnyx | Messaging APIs

DevOps & AI

Docker | AWS | Git | TensorFlow | LLMs

Drones

ArduPilot | Pixhawk | UAV Design | FPV

LANGUAGES

English (Fluent)

Telugu (Native)

Hindi (Fluent)

Tamil (Conversational)

PROFESSIONAL SUMMARY

Versatile engineer with 3+ years at Telnyx resolving VoIP/messaging issues at scale, combined with 5+ years building robots, drones, and 3D printed prototypes. Built Python tools saving 5-10 min per investigation ticket. Founded Printles, delivering AI-powered websites and communication tools. 50+ technical workshops delivered. CGPA 8.52 in Aeronautical Engineering.

WORK EXPERIENCE

NOC Engineer (Weekend)

May 2022 - Present

Telnyx LLC - Remote

- Resolve VoIP, messaging, and Fax API issues on global carrier-grade infrastructure
- Built Python automation tool for L1 engineers, cutting per-ticket investigation by 5-10 minutes
- Developed AI chatbot prompts improving first-response efficiency across support channels
- Key contributor to fraud detection and incident monitoring, improving system reliability
- Leveraged AI to enhance support accuracy with measurable service quality improvements

Founder & Lead Engineer

2024 - Present

Printles - Chennai, India

- Founded AI-first digital agency: custom websites, AI chatbots, voice agents, and mobile apps
- Built and deployed 20+ production sites on global edge CDN with auto-SSL and near-zero downtime
- Integrated Telnyx voice/messaging APIs for enterprise communication automation

3D Printing & Technology Consultant

2019 - Present

Independent - Chennai, India

- CAD modeling and rapid prototyping using Fusion 360, AutoCAD, CATIA for parts, drone frames, enclosures
- Operated FDM, SLS, SLA printers: material selection, optimization, post-processing, quality control
- Conducted 50+ workshops in 3D printing, CAD, robotics, IoT for students and professionals
- Mentored hackathon teams from concept design to working prototypes at national competitions

Part-Time Technical Engineer

May 2018 - Mar 2020

Vimanam PVT LTD - Chennai

- Client-facing engineering support for drone and robotics products over 2-year engagement

KEY PROJECTS

AI Agriculture Robot - Autonomous robot with computer vision, IoT sensors, 3D printed components, Twilio alerts

Heavy Payload Hexacopter - 5kg+ industrial drone with 3D printed landing gear and payload mounts. Seed-funded.

Smart Robotic Arm - 6-DOF 3D printed arm with inverse kinematics, Bluetooth control, pick-and-place automation

NOC Automation Tool - Python tool automating distributed log searches, saving 5-10 min/ticket at Telnyx

IoT Home Automation - Full-home voice control, remote switching, energy monitoring via RPi, Arduino, MQTT

EDUCATION

B.Tech Aeronautical Engineering

2017 - 2021

Sathyabama Institute of Science and Technology, Chennai - CGPA: 8.52

President of Aero Club (2 years). Led technical events, research projects, mentored juniors.
